

# Global Insecticides Market Worth Expected To Reach \$25.2 billion by 2023 According To TBRC

*TheBusinessResearchCompany.com announces Insecticides Global Market Report 2020 from its research database.*

World population is growing and is expected to reach 10 billion by 2050 and is expected to significantly boost the insecticides market.”

*Abdul Wasay*

LONDON, GREATER LONDON, UK, January 22, 2020 /EINPresswire.com/ -- The global insecticides market is expected to grow at a rate of about 12% and reach \$25.2 billion by 2023. The increase in demand for food for the growing population will promote the growth of insecticides market. However, increased awareness of the diseases and problems caused due to insecticides is expected to have a negative impact on the growth of the market in the forecast period. The insecticides market consists of sales of insecticides. Insecticides are substances that are used to kill insects, including ovicides and larvicides, used for insect eggs and larvae respectively, in order to control pests that affect the cultivated crops.

The global insecticides market is further segmented based on type and geography.

By Type - The insecticides market is segmented into synthetic insecticides and bio-insecticides.

By Geography - The global insecticides is segmented into North America, South America, Asia-Pacific, Eastern Europe, Western Europe, Middle East and Africa. Among these regions, the Asia-Pacific insecticides market accounts for the largest share in the global insecticides market, with around 41% of the market.

## Trends In The Insecticides Market

Companies in the insecticides industry are developing new products and improving product composition to make them safer for workers, farmers, plants, and the soil. Every year, companies globally introduce new products or brands to cater to different sets of audiences, insects, and industries. This translates to changes in the base solution, mode of application, and residue formation of the insecticide. Order a Copy Of Entire Report @
