- Bionix Development Corporation
- BSN Medical
- C.R. Bard, Inc
- CooperSurgical, Inc
- Stryker Corporation
- Zimmer Biomet
- SunMed
- Centurion Medical Products
- Westmed, Inc.
- PulseCare Medical, LL

The market for wound irrigation system is expected to grow significantly due to factors such as increasing prevalence of diabetes & related chronic wounds. However negligence towards the use of wound irrigation systems is expected to act as major restraining factor for the growth of the market. In addition, investment in research and development activities for the development of better and advanced products and technologies to be used in the healthcare industry offer great growth opportunities for the market during the forecast period. Also the future trend such as product development is expected to drive the market in coming years.

Market Insights

Increasing Prevalence of Diabetes & Related Chronic Wounds

Chronic wounds, unlike the other types of wounds, require more extended healing periods. Common examples of chronic wounds include pressure ulcers, ischemic ulcers, diabetic foot ulcers, venous ulcers, and infectious surgical or traumatic injuries. These wounds symbolize a significant burden on patients, healthcare professionals. The condition is expected to affect almost 5.7 million patients in the United States, leading to an overall expenditure of nearly US\$20 billion annually. According to the International Diabetes Federation (IDF), in 2017, the number of people with diabetes in North America was approximately 46 million, which is expected to grow to 62 million in 2045. Type 2 diabetes is the most commonly occurring form of diabetes and has increased owing to cultural and societal changes. Around 91% of adults suffer from diabetes type 2 in many of the high-income countries. According to the International Diabetes Federation (IDF), approximately 425 million people were living with diabetes in 2017, and it is expected to reach 629 million by 2045 across the globe. Hence, the factors mentioned above are anticipated to fuel the demand for wound irrigation systems market worldwide at a considerable rate during the coming years.
