The fourth party logistics market by end-user is segmented into Aerospace and Defense, Automotive, Consumer Electronics, Food and Beverage, Industrial, Healthcare, Retail, and Others. Fourth Party Logistics industry is growing at a high rapid pace and successfully introduces new advancements.

In a dynamic era, manufacturers are developing diversified product categories, packaging designs, and numerous logistics arrangements which results into astounding amount of complexity creation in the form of expanding product variations, fragmented channels, and rising customer demands for the tailored solutions. Therefore, it is projected to create tremendous opportunities for lead logistics providers in the fourth party logistics market. This are efficient in managing entire supply chain, starting from packaging till last mile delivery.

The high-tech consumer electronics and the medical equipment markets today are highly driven by diverse consumer demands coupled with customization features. Strategies such as build-to-order and postponement are often deployed for selling products from the high-tech electronic verticals by many retailers, websites, resellers etc.

In many scenarios faced by consumer goods and retail sectors, a customer orders large volumes of products that might be sourced at different locations. These diverse products need to be assembled first, and then need to be shipped to the consumer at the earliest possible timelines. Fulfillment of such demands requires the deployment of a highly sophisticated and Omni-channel supply chain approach by the logistics service provider. This factor is anticipated to provide huge opportunities to the players operating in the fourth party logistics market.

Asia-Pacific was the leading geographic market and it is anticipated to be the highest revenue contributor throughout the forecast period. The huge population, growing disposable incomes, rising domestic consumption and lower costs are some of the factors attributing to the growth of e-commerce sector in countries like China, India, Taiwan, Japan and South Korea, which is further expected to fuel fourth party logistics market in this region.
