Digital Remittance is an online service that lets people send money to friends and family living abroad, using a computer, smartphone or tablet.

Beyond the pure fee costs, important time, reach, and security benefits accrue from digital remittances. The cost savings from digital remittances could be a meaningful boost to global GDP and have a noteworthy impact on poverty. In order for all of these positive developments to be realized, and enabling environment for digital remittances must be created.

Identity, connectivity, banking, and literacy solutions for all must be developed by the public and private sectors in collaboration. With the current refugee crisis, the time is ripe for digital remittances to provide enhanced economic opportunity for those that need it most.

In the foreseeable future, Digital Remittance will show an optimistic upward trend. Although Digital Remittance bring a lot of opportunities, the study group recommends the new entrants who just have money but without technical advantage and financial support, do not enter the Digital Remittance field hastily.
