

Hasan Surgery Conducts the First Annual Symposium on Patient Safety, Quality and Clinical Governance in Plastic Surgery

A leading plastic surgery clinic in Dubai Health Care city conducted first of its kind symposium on Patient safety, quality and clinical governance.

DUBAI, UNITED ARAB EMIRATES, January 30, 2020 /EINPresswire.com/ -- Hasan Surgery - a leading [plastic surgery clinic in Dubai Health Care city](#) conducted first of its kind symposium on Patient safety, quality and clinical governance in Plastic Surgery.

Symposium was conducted by 10 international speakers and the quality team from Dubai Health Care City. The speakers shared their experience, knowledge, and skills with the participants. The event included a full session on patient safety and quality presented by the CEO and executive director of the American Association for Accreditation of Ambulatory surgery facilities (AAAASF).

The symposium was a unique and commendable effort that was in line with the Dubai Health Care City's vision of providing the highest quality standard medical facilities to international patients. The presence of DHCR quality team, CEO Dubai Health Care City is a testament to the importance and government level appreciation of the event that aimed to intensify the efforts of patients' safety with quality and clinical governance in Plastic Surgery.

Opening the symposium, [Dr. Hasan Ali](#), MD Hasan Surgery shared his vision of developing strong quality and clinical governance measures at international standards to ensure patients' safety. He also expressed his gratitude towards the local and international accredited authorities for speaking at the event.

The symposium included into four distinctive sessions including:

Session 1: QUALITY AND SAFETY IN PLASTIC SURGERY

- The importance of Accreditation in the Global Healthcare marketplace
- Findings and patient safety Hazards in ambulatory centers

- Carpal Tunnel syndrome

A First of its kind Symposium in Dubai Health Care City

Dubai Health Care City has grown out to be one of the leading healthcare city in the region, attracting millions of medical tourists each year. Plastic Surgery is one of the most sought-after medical treatment for international tourists. However, globally there have been numerous cases of fatal incidents including death due to below-standard plastic surgery procedures.

While all sorts of surgeries come with an element of risk, integrating strict quality and clinical governance measures can minimize the risks and save lives. The symposium also highlighted the importance of choosing a certified and professional plastic surgery clinic for patients, who often resort to inexpensive inexperienced and unqualified practitioners.

Hasan Surgery was one of the first plastic surgery clinics in Dubai Health Care City to obtain necessary certifications and continue to inspire and lead plastic surgery clinics in implementing the highest standard clinical governance for patients' safety.

Until there are more oversight and regulation on who can perform these procedures, it is important that the consumer thoroughly researches the credentials of not only the physician performing the procedure but also to make sure that the facility is fully accredited. Please do your homework and find out if your surgeon is a board-certified plastic surgeon by visiting the American Society of Plastic Surgeons or the American Board of Plastic Surgery websites.
