

NIXALITE OF AMERICA CELEBRATES 70th ANNIVERSARY

Providing effective and humane pest bird and wildlife control products since 1950

EAST MOLINE, IL, UNITED STATES,
January 29, 2020 /EINPresswire.com/ --
The year 2020 marks the 70th anniversary for Nixalite of America Inc, a privately held family-owned and operated business.

In 1950 the Nixalite Company manufactured and patented the [world's first bird spike](#) originally called Nixalite Porcupine Wire. It did not take long for people to realize the true potential and benefits that these prickly stainless steel spikes had to offer. Businesses and consumers alike were soon using Nixalite to humanely rid pest birds from their buildings, homes, and property.

Nixalite's New 70th Logo

Seventy years and Four generations later, Nixalite of America Inc is still hard at work manufacturing and supplying the world with an extensive line of pest, bird, and wildlife control products. To learn more about Nixalite's impressive seventy-year history click here: [Nixalite Turns 70](#)

“

We are extremely proud to continue and grow the Nixalite Heritage.”

Nixalite Premium Bird Spikes

leading architects specify:

Nixalite
BIRD BARRIER AND REPELLENT

The architect is naturally concerned with preserving the beauty of his own creations. He realizes, too, that building owners lose millions yearly from corrosive damage caused by bird excreta. Costs are sky-highed by ruble-chipped drains and gutters, fire and litter. Architects choose Nixalite for bird-free stain-free buildings. Inconspicuous Nixalite functions as an integral design component blending naturally with structural features—permanently effective, yet easily removed. Nixalite's needle-sharp stainless steel points (10 per inch) keep 'em flying. Lasts a lifetime, yet pays its way in just one year.
