With the US space sector adjusting to the new US Space Force, taking forward the WGS-11 program, and investing further in LEO programs (such as Blackjack) and COMSATCOM integration, this is a crucial time to explore and discuss US SATCOM capability. [MilSatCom USA](#) will bring together military and government leaders, both from the US and from key allies, and major industry SATCOM providers to explore MILSATCOM in depth. Topics of discussion will include emerging US Space policy, SATCOM resiliency and redundancy, partnership and collaboration between nations and organisations, and expeditionary SATCOM for the Warfighter.
