

# Ideagen Reaches For The Stars With Top US Space Discovery Agency Contract

*Jet Propulsion Laboratory Becomes The Latest Customer of Pentana Audit*

NOTTINGHAM, UNITED KINGDOM, February 6, 2020 /EINPresswire.com/ -- Leading global provider of governance, risk and compliance software, UK company [Ideagen Plc](#), has signed a long-term contract with California-based constructor and operator of planetary robotic spacecraft, Jet Propulsion Laboratory (JPL).

Founded in the 1930s, JPL is a federally funded research and development centre managed for NASA by the California Institute of Technology (Caltech). The lab's current major projects include the Mars Science Laboratory mission (which includes the Curiosity rover), the Mars Reconnaissance Orbiter and the Juno spacecraft orbiting Jupiter. JPL is also responsible for operating NASA's Deep Space Network.

Ideagen has a close relationship with the US Institute of Internal Auditors, which means companies using the [Pentana](#) software have the comfort of knowing their audits are being done to the standards expected by the Institute and comply with the guidance it issues.

“

Companies are placing increasing importance on compliance and good governance. Ideagen's Pentana software ensures internal audits meet the standards expected by the US Institute of Internal Auditors.”

*Colin Smith, Head of Sales, Audit & Risk at Ideagen*

JPL operates in a highly sensitive and regulated environment and the need for security and top-quality governance processes is paramount. Ideagen's Pentana Audit solution offered the lab the benefits of leading software together with the flexibility of both cloud-based and on-premise data storage options.

Colin Smith, Head of Sales, Audit & Risk at Ideagen, commented: “Companies are placing increasing importance on compliance and good governance, driven in part by some very high-profile failures of governance by large organisations in recent years. Ideagen's Pentana

software is tried, tested and ensures internal audits are carried out to the standards expected by the US Institute of Internal Auditors.

"JPL are dealing with incredibly complicated and potentially life changing endeavours. We are extremely proud to have been chosen by them and look forward to helping to ease their burden when it comes to the audit process."
