Approximately 700,000 deaths in Europe, the United States and Japan were related to acute kidney injury. Improved understanding of acute kidney injury is expected to increase the demand for care. Market for acute kidney injury treatment is increasing the renal ultrasonography

needed to search for reversible cause of acute kidney injury such as kidney stone obstruction. Renal ultrasonography helps identify ischemic acute damage to the kidney and reduced renal blood flow. Acute kidney injury has now been widely recognized for a few days as a serious health-care concern. The demand for treating acute kidney injury is expected to grow with a multi-faceted quality assurance plan to improve treatment for acute kidney injury. Acute kidney injury is increasingly prevalent in developed and developing countries alike. Government awareness-raising efforts are expected to accelerate the development of the healthcare industry through the implementation of various Acute Kidney Injury services. The medical or healthcare industry is expected to drive market growth for the Acute Kidney Injury. Nevertheless, side effects of drugs impede market growth.

The market for Acute Kidney Injury Treatment is segmented based on injury type, therapy, distribution channel, and region. On the basis of Injury Type segment, the market is classified into Pre-renal, Intrinsic renal and Post-renal. The pre-renal acute kidney injury segment held a principal share in the global market for acute kidney injury treatment in 2018 in terms of injury type. The pre-renal acute kidney injury segment is estimated to gain market share by the end of 2027, in the acute kidney injury care market.

Based on the Therapy segment, the market is bifurcated Intermittent hemodialysis, Continuous renal replacement therapy and Sustained low-efficiency dialysis. Based on the Distribution Channel segment, the market is bifurcated into Hospital pharmacies, Online pharmacies and Others. The distribution channel group for hospital pharmacies will have a significant share over the coming years. Hospital pharmacies typically store a large number of drugs and advanced equipment and provide hospital patients with medication. The burden of genetic disorder would increase the number of hospitalizations, thereby having a positive effect on hospital pharmaceutical development.

Regional segmentation includes the current and forecast demand for Asia Pacific, North America, Latin America, Europe, and Middle East & Africa with its further bifurcation into major countries. The increase of disease-oriented drug research in North America and the development of both approved and symptomatic treatment for acute kidney injury are expected to dominate the global acute kidney injury treatment market. Asia-Pacific is expected to be the fastest growing area for treating acute kidney injury, due to the large pool of patients and increasing investment in better healthcare facilities.

Some of the players included in Acute Kidney Injury Treatment market are Angion Biomedica Corp., AM-Pharma, Quark Pharmaceuticals, Inc., Baxter International, Inc., Fresenius Medical Care AG & Co. KGaA., B. Braun Melsungen AG, Asahi Kasei Medical Co., Ltd., and LG Chem. amongst others.

The report segments global Acute Kidney Injury Treatment market as follows:

Global Acute Kidney Injury Treatment Market: Injury Type Segment Analysis

- Pre-renal
- Intrinsic renal
- Post-renal

Global Acute Kidney Injury Treatment Market: Therapy Segment Analysis

- Intermittent hemodialysis
- Continuous renal replacement therapy
- Sustained low-efficiency dialysis

Global Acute Kidney Injury Treatment Market: Distribution Channel Segment Analysis

Hospital pharmacies
Online pharmacies
Others

Global Acute Kidney Injury Treatment Market: Regional Segment Analysis

North America
U.S.

Europe
UK
France
Germany

Asia Pacific
China
Japan
India

Latin America
Brazil

Middle East and Africa
