

# Orthopedic Oncology Market to Garner USD 1.23Bn, Globally, by 2025 at 2.2% CAGR- Goldstein Research

*The bone grafting techniques is anticipated to grow at the highest rate.*

NEW YORK, NEW YORK, UNITED STATES, February 17, 2020 /EINPresswire.com/ -- Goldstein Research recently published a report, titled, "Global Orthopedic Oncology Market Outlook 2025: Opportunity & Growth Analysis." As per the report, Global Orthopedic Oncology industry is set to reach USD 1.23 billion by 2025, at a CAGR of 2.2% over the forecast years. The latest trend gaining momentum in the market is the use of carbon-fiber-reinforced composite implants in orthopedic surgery. Players in the orthopedic oncology industry are focusing on developing low-cost oncology surgery technologies designed to provide the most effective solutions for orthopedic oncology surgeons.

## Major Reasons for Market Fluctuations

Revolution of orthopedic devices manufacturing through 3D printing, ageing Population with increasing risk of developing cancer and growth in healthcare expenditure worldwide drive the growth of Global Orthopedic Oncology market. However orthopedic oncology accounts for a very small percentage in the field of orthopedics due to fact that the incidences of bone and soft tissue tumors are rare as compared to the benign tumors of musculoskeletal system which includes trauma, spine, hand and upper extremity, total joints and even pediatric orthopedics. On the contrary, growth opportunities in emerging markets and higher number of unmet needs for the treatment of orthopedic tumors are expected to create lucrative opportunities in the industry.
