According to ZMR, the Aviation Security Market analysis was valued at around USD 11,025 Million in 2019 and is expected to reach over USD 17,700 Million by 2026”

Zion Market Research

A tremendous rise in international trade and air travelers has been witnessed in the near years. The increase in air travellers triggers the demand for security in aviation sector. It is important to prevent threats, accidental harm and other crimes. Airline companies are investing more on security parameters to safe guard the passengers, air crafts staff, etc. Hence, the airline companies install several x-ray detectors, baggage screeners, explosive, and metal

detectors.

With the increase in security threats, the demand for establishing and implementing the new technologies is expected to drive the market. Enhancement in security appliances and screening

technology is expected to trigger the market over the forecast years.

Factors such as the discrepancy in the government guidelines, high installation cost, and regular upgrading of security devices is expected to hinder the market in the forecast timeframe.

The perimeter security is focused upon the natural barriers like rocky mountains, icy oceanic perimeter. Cyber security refers to the structure of technology. Cyber security is a very important parameter as the data collected by government is stored using software. This software can be hacked causing data leakage and the information can be misused. Surveillance employs a close observation. To make surveillance easy cameras can be installed for recording and spying. Screening of the articles and luggage are done at the entrance for security purposes. Screeners can be of different types for instance x-ray screener, vacuum screener, etc. Screeners give a raise to market of aviation security systems. The access control is given to only authorized person for security purposes. The controller records the data of accessing person with the location and time.

The need of technological advancements in order to prevent disasters also boosts the requirement adopt the aviation security systems. North America and Europe are the key adopters of the software globally. Europe accounted for approximately one fourth of market share as Europe ranks the highest in air traffic. Developing countries in Asia pacific are investing for construction of airports thereby triggering the demand for aviation security market. India has invested around Rs.1100 Million in recent years to upgrade aviation parameters. Some of the key market players in market are Lockheed Martin Corporation, Raytheon Co., Boeing Co., Northrop Grumman Corp., Booz Allen Hamilton Inc., BAE systems plc., General Dynamics Corporation and among others. This report segments the aviation security market analysis as follows:

Global Aviation Security Market Analysis by Technology -

- Perimeter Security
- Cyber security
- Surveillance
- Screening
- Access Control

Global Aviation Security Market Analysis by Region-

- North America
- U.S.

- Europe
- UK
- France
- Germany

- Asia Pacific
- China
- Japan
- India

- Latin America
- Brazil

- Middle East and Africa

About Us:

Zion Market Research is an obligated company. We create futuristic, cutting-edge, informative reports ranging from industry reports, the company reports to country reports. We provide our clients not only with market statistics unveiled by avowed private publishers and public organizations but also with vogue and newest industry reports along with pre-eminent and niche company profiles. Our database of market research reports comprises a wide variety of reports from cardinal industries. Our database is been updated constantly in order to fulfill our clients with prompt and direct online access to our database. Keeping in mind the client's needs, we have included expert insights on global industries, products, and market trends in this database. Last but not the least, we make it our duty to ensure the success of clients connected to us—after all—if you do well, a little of the light shines on us.
