Global Edible Nuts Market expected to reach around USD 92.1 billion by 2026, at a CAGR of around 3.5% between 2019 and 2026.”

Zion Market Research

Edible nuts contain high-quality fiber, minerals, vegetable protein, oils, and vitamins, which are vital for the healthy functioning of the human body. These health benefits have made edible nuts essential for human consumption. The nutritional value provided by these nuts has augmented their market growth.

The edible nuts market is likely to grow notably in the years ahead, owing to the in their growing use in the global food

industry worldwide due to their high nutritional value. Bakery and confectionary and breakfast cereals are the major products that use edible nuts. This vast list of applications of edible nuts is also fuelling the edible nuts market globally. Moreover, edible nuts are a healthier alternative for the aged population, as the consumption of edible nuts helps in preventing diabetes, heart diseases, obesity, and allergies. The growing health consciousness will further drive the edible nuts market. The rising awareness about the benefits of nutritious edible nuts along with their easy availability on e-commerce websites and offline stores has also been aiding this market. The rise in the number working youth along with their improving living standards is another catalyst for the edible nuts market. Thus, the applications of edible nuts will always fuel their demand. The nutritional value of these nuts also adds value to personal care products. The edible nuts though high in nutritional value should not be taken in excess every day, as it is tough for the liver to digest them in large quantities, which may restrain the market growth.
