Introduction/Report Summary:

This report provides in depth study of "[Courier, Express and Parcel \(CEP\) Market](#)" using SWOT analysis i.e. Strength, Weakness, Opportunities and Threat to the organization. The Courier, Express and Parcel (CEP) Market report also provides an in-depth survey of key players in the market which is based on the various objectives of an organization such as profiling, the product outline, the quantity of production, required raw material, and the financial health of the organization.

CEPs are used for the delivery of parcels and documents to various types of customers such as business customers, retail customers, and government agencies. The documents and parcels delivered by the CEP vendors are non-palletized items and weigh less than 110 pounds. Express delivery is a time-bound delivery, where the shipment is delivered within a day or two and also as per the requirements of a customer. Whereas, courier service providers deliver shipments that are in very short distance. In addition, CEP vendors provide various value-added services to customers, further enhancing the delivery process.

To a certain extent, the rise of the CEP Industry is attributed to the failure of the traditional Postal companies to cope with the changing customer responsiveness, not being more market focused and not able to provide faster services. With the market becoming global, the CEP companies expanded into various geographies, through their International services and started capturing more market share.
