

Advances in Technology in the Freight Industry Highlighted On Laurence Fishburn's "Behind The Scenes"

The educational program highlights how technology may be a key for the future of agriculture.

MIAMI, FLORIDA, UNITED STATES, February 19, 2020 /EINPresswire.com/ -- Award-winning American actor [Laurence Fishburne](#) is the host of the informational show "Behind The Scenes" with Laurence Fishburne. The TV program covers a large variety of topics about issues that impact people around the globe. An upcoming episode will discuss technology advances in the freight industry.

Every day, technology continues to develop further and achieve new heights. Through the means of the internet, most people can buy and have delivered what they need in a matter of a day or a few. Many people are unable to physically go to a store to purchase what they need, whether it be due to a disability or a busy schedule. The freight industry plays a vital role in the lives of many individuals.

New technology is leading to improvements in the supply chain, which means an overall lessening of costs and errors. Trucking transportation, international transportation, shipment tracking, and supply chain management all benefit from these technological advances. The latest tracking software is one of the most recent developments in the freight industry. Current shipment tracking uses software that gives customers access to shipping and tracking systems at any time of any day. Improved GPS accuracy is leading to increased productivity and customer satisfaction by providing traffic data and the locations of trucks. Additionally, autonomous vehicles and drones are on the horizon to streamline the shipping process.

It is unquestionable how technology advancements impact lives, and the freight industry is no exception. The new episode of "Behind The Scenes" will feature industry professionals as they discuss these developments in the freight industry.

"Behind The Scenes" with Laurence Fishburne is a cautiously reviewed informational TV show before public broadcast. The program has accepted a multitude of awards for its efforts.
