

Valtix Achieves AWS Advanced Technology Partner Tier

Valtix Achieves AWS Advanced Technology Partner Tier and Enterprise Contract Enablement

SANTA CLARA, CA, UNITED STATES, February 24, 2020 /EINPresswire.com/ -- SANTA CLARA, Calif. – February 24, 2020 – Valtix, the developer of the cloud-native firewall and network security as a service, announced today that it has achieved Advanced Technology Partner status in the Amazon Web Services (AWS) Partner Network (APN). The new APN Partner status recognizes Valtix's ability to deliver SaaS cloud-native network security service with fast time-to-protection and time-to-value across the enterprise applications in the cloud, which can exponentially increase software agility and consistently protect workloads in the cloud.

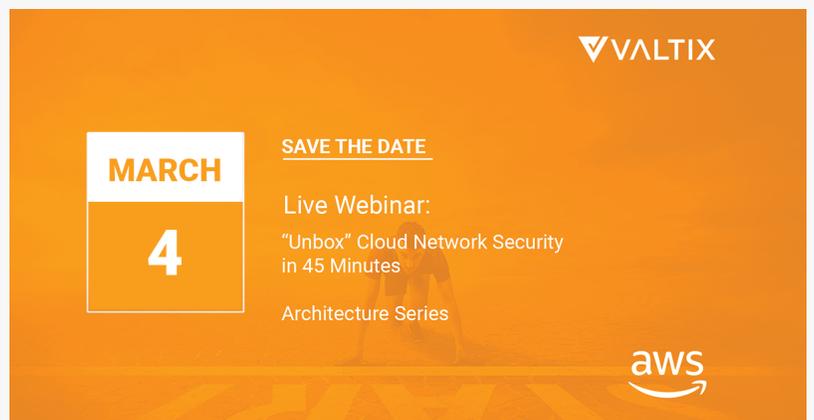

To attain APN Advanced Technology Partner status, Valtix has established an innovative cloud-native network security service certified via AWS's stringent technical certification. Additionally, Valtix has validated its expertise through a wide range of enterprise references that demonstrate strong customer value by eliminating security firewall appliance management and operational challenges with a SaaS-based Cloud Controller.

“

Increasingly, AWS has delivered many integrated native security solutions to protect enterprise applications and data in the cloud.”

services are designed to protect Internet-facing applications from advanced attacks and prevent

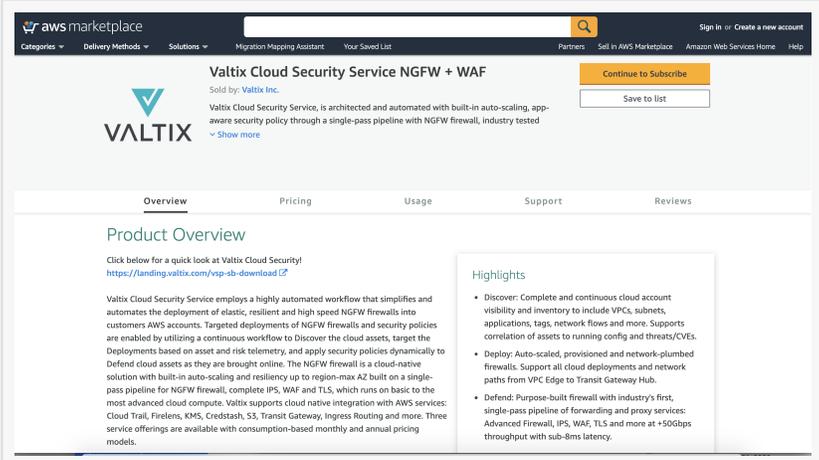

Unboxing Cloud Network Security with Valtix and AWS

With a focus on an advanced network security service approach and simplifying enterprise security operations, Valtix is also included in the Enterprise Contract for AWS Marketplace, which gives large enterprise customers the option to purchase software solutions using a standardized contract template under which participating sellers have agreed to offer their products. AWS customers that approve use of the Enterprise Contract for AWS Marketplace can immediately subscribe and deploy Valtix network security service including Next-Generation Firewall (NGFW) and Web Application Firewall (WAF) across AWS Availability Zones, AWS accounts, and AWS Regions. These

data exfiltration on outbound flows.

“Increasingly, AWS has delivered many integrated native security solutions to protect enterprise applications and data in the cloud,” said Vishal Jain, CEO and Co-Founder, Valtix. “We are pleased to elevate our relationship as an APN Advanced Technology Partner so that we can help our shared customers to accelerate their digital transformation by leveraging AWS to reduce complexity, cost, and increase agility while keeping their cloud applications secure.”

Valtix Cloud Security Service NGFW + WAF
Sold by: Valtix Inc.
Valtix Cloud Security Service, is architected and automated with built-in auto-scaling, app-aware security policy through a single-pass pipeline with NGFW firewall, industry tested

Product Overview

Valtix Cloud Security Service employs a highly automated workflow that simplifies and automates the deployment of elastic, resilient and high speed NGFW firewalls into customers AWS accounts. Targeted deployments of NGFW firewalls and security policies are enabled by utilizing a continuous workflow to Discover the cloud assets, target the Deployments based on asset and risk telemetry, and apply security policies dynamically to defend cloud assets as they are brought online. The NGFW firewall is a cloud-native solution with built-in auto-scaling and resiliency up to region-max AZ built on a single-pass pipeline for NGFW firewall, complete IPS, WAF and TLS, which runs on basic to the most advanced cloud compute. Valtix supports cloud native integration with AWS services: Cloud Trail, FireLens, KMS, Credential, S3, Transit Gateway, Ingress Routing and more. Three service offerings are available with consumption-based monthly and annual pricing models.

Highlights

- Discover: Complete and continuous cloud account visibility and inventory to include VPCs, subnets, applications, tags, network flows and more. Supports correlation of assets to running config and threats/CVEs.
- Deploy: Auto-scaled, provisioned and network-plumbed firewalls. Support all cloud deployments and network paths from VPC Edge to Transit Gateway Hub.
- Defend: Purpose-built firewall with industry's first, single-pass pipeline of forwarding and proxy services: Advanced Firewall, IPS, WAF, TLS and more at +50Gbps throughput with sub-8ms latency.

AWS Marketplace - Valtix Network Security Service

Valtix delivers enterprise network security service in the cloud combined with the automation, scale, and agility of network security as a service, ensuring protection of cloud application workflows while reducing cloud security complexity for its customers.

If you want an enterprise-grade network security service without constraints, while also taking full advantage of the scale, economics, and elasticity the cloud has to offer, try out Valtix Sandbox Free Tier in AWS Marketplace.
