

Recycled Ocean Plastics Market 2020 Global Share, Trend And Opportunities Forecast To 2025

Wiseguyreports.Com Adds "Recycled Ocean Plastics Market" To Its Research Database

PUNE, MAHARASHTRA, INDIA, March 2, 2020 /EINPresswire.com/ -- [Recycled Ocean Plastics Industry](#)

Description

Plastic production has increased by about 200 times since 1950. Only 9% of the plastic ever made has been recycled. The remainder is burned or thrown away into nature or landfills. Since plastic is so rigid, it can last for centuries without breaking down. This means that plastics made and thrown away in the past are often found in the earth's oceans.

The plastic in oceans originates in both land-based and marine sources. It is estimated that nearly 80% of ocean plastics come from land-based sources and the remaining 20% comes from marine sources. Plastic marine waste refers to pollution from fishing fleets, which leave behind fishing nets, boats, ropes and sometimes abandoned vessels. Of the 20% from maritime sources, approximately 10% is estimated to come from fishing fleets. This is backed by estimates from the United Nations Environment Program (UNEP) which shows that unused, missing or discarded fishing gear contributes about 10% of total ocean plastic.

Request for Sample Report @ <https://www.wiseguyreports.com/sample-request/4907033-recycled-ocean-plastics-market>

There are several routes via which plastic enters the ocean ecosystem. Plastic reaches the ocean from coastlines, rivers, tides and aquatic sources.

Report Includes:

- An overview of the recycled ocean plastics market
- Analyses of the global market trends with data from 2018 to 2019, and projections of compound annual growth rates (CAGRs) through 2024
- Insight into the Top 20 countries ranked by mass of mismanaged plastic and input of plastic to the oceans from most polluting rivers across the World
- Information on opportunities and challenges with respect to using plastic waste as a resource with the help of recycled ocean plastics

Table of Contents

Chapter 1 Recycled Ocean Plastics Market
Introduction

Plastics in the World's Surface Ocean
Opportunities
Use Plastic Waste as a Resource
Market Forecast of Recycled Ocean Plastics by Resin Type
Polyethylene Terephthalate (PET)
High-Density Polyethylene
Low-Density Polyethylene
Polypropylene
Polyvinyl Chloride
Polystyrene
Polyurethane
Polycarbonate
Other Resins
Market for Recycled Ocean Plastics by End Use
Consumer Products
Building Products
Automotive
Industrial and Commercial
Market for Recycled Ocean Plastics by Region
Asia-Pacific Market for Recycled Ocean Plastics
European Market for Recycled Ocean Plastics
North American Market for Recycled Ocean Plastics
RoW Market for Recycled Ocean Plastics
Analyst's Credentials
Reason for Doing This Study
Intended Audience
