

Cable Matters "Made for Google" Certified Product Debuts on Google Store

SOUTHBOROUGH, MASSACHUSETTS, UNITED STATES, March 3, 2020 /EINPresswire.com/ -- [Cable Matters®](#), an industry-leading supplier of connectivity solutions, announced the availability of its new Pro Series USB-C Multiport Adapter on the [Google Store](#). The Google Store placement follows rounds of rigorous product testing in the "Made for Google" program.

The Pro Series USB-C® Multiport Adapter is the perfect portable docking station for Google's new Pixelbook® Go and other thin laptops that forego traditional ports in favor of several USB-C ports. The adapter features ports laptop users demand – an HDMI® port, Ethernet port, USB-C charging port, and two USB 2.0 ports – all delivered through a single USB-C connection. A built-in magnetic cable management system makes storage easy. Technical specifications of each port are as follows:

- HDMI (4K@60Hz)
- Ethernet (480Mbps)
- Two USB-A (USB 2.0, data transfer up to 480Mbps)
- USB-C Power Delivery Port (Up to 80W charging)

Participation in the Made for Google program means the Pro Series USB-C Multiport adapter passed rigorous testing for reliability, safety, performance, and compatibility with Google's Pixelbook and Pixelbook Go. The adapter also works with other Chrome OS®, Windows®, and macOS® laptops. Additional information on the Made for Google program can be [found here](#).

"USB-C only laptops are thin, lightweight, and can be incredibly versatile, but only if you have the right adapters. Our Pro Series USB-C Multiport adapter lets users easily take full advantage of the power of their laptop's USB-C port while on-the-go," said Jeff Jiang, President of Cable Matters. "Partnering with the Made for Google program aids in our mission to offer some of the most innovative USB-C products on the market, while making the Pixelbook more approachable for first-time users."
