VR Game Market

## Overview

The virtual gaming market is projected to witness a rapid growth at a CAGR of 22% during the forecast period. Rising growth of virtual gaming and increasing technological advancements in VR & AR gaming are the key forces that are driving the global market. Improvement in the 3D multimedia graphics performance has also played a vital role in the growth of the global virtual gaming market. Virtual reality games for smartphones are estimated to be the dominating sectors after development in gaming consoles across the globe. Gaming consoles are predicted to appear as the most preferred devices due to the presence of efficient processors as compared to desktops and smartphones. The VR technology is expected to hold the largest market share and lead the virtual gaming market between 2018 and 2023. The VR technology is used for applications such as gaming and entertainment. The use of VR technology in various gaming types such as PC gaming, gaming consoles, internet games, smartphones, and tablets is estimated to drive the virtual gaming market.
