

# New AV Costar Omni Camera Recognized with Two Industry Awards

*The new ConteralP® Omni LX Remote Setup camera has been recognized by both Security Today Magazine & Secure Campus Magazine with individual product awards*

LOS ANGELES, CA, UNITED STATES, March 10, 2020 /EINPresswire.com/ -- [Arecont Vision Costar](#) (AV Costar), an industry leader in IP-based megapixel camera technology and video surveillance solutions, will receive two security industry awards for the new adjustable view, omnidirectional [ConteralP®](#) Omni LX Remote Setup camera. The newest Omni platform is shipping to customers worldwide, offering easy installation and setup plus advanced features in a megapixel camera that covers any view up to 360 degrees for non-stop situational awareness.

Two 2020 industry awards for new ConteralP Omni LX Remote Setup camera

“

The market for multi-sensor cameras that the company launched has matured, & it's very exciting that our newest cameras continue to receive recognition for their unique capabilities & features”

*Jeff N Whitney, VP Marketing,  
AV Costar*

AV Costar's Omni LX Remote Setup camera was first unveiled at last fall's GSX Chicago conference, and is now generally available. AV Costar brings a proud legacy of surveillance industry leadership, pioneering the first panoramic 180-degree multi-sensor megapixel cameras, followed by the first adjustable view, 4-sensor omnidirectional models, with multiple follow-on generations adding new features, capabilities, and designs.

“We're extremely pleased with this new industry recognition from Security Today and Secure Campus,” said Jeff Whitney, Vice President of Marketing, AV Costar. “The market for multi-sensor cameras that the company launched has matured, and it's very exciting that our

newest cameras continue to receive recognition for their unique capabilities and the simplicity of installation and operation that they offer to customers.”

The new Omni LX Remote Setup offers the most advanced capabilities and features of any omnidirectional multi-sensor camera, including hands-free setup. The camera is easily installed with a unique, time saving mounting design on a wall, ceiling, pole, emergency call box, or other structure. All 4 sensors can then be remotely moved into position from the safety of the ground over the network. The installer remotely uses the pan, tilt, zoom, and focus controls to lock in non-stop coverage of virtually any viewing area. 180-, 270-, and 360-degree presets speed setup, with the ability to further adjust and save additional viewing choices. These capabilities eliminate the need for a service call or use of a lift or ladder to change or fine tune the view, saving both

time and money. The Omni LX Remote Setup brings even higher performance and reliability than earlier models, all in a compact PoE dome.

Security Today and Secure Campus will present the two new awards to AV Costar in the Costar Technologies, Inc. booth (#8045) during the rescheduled ISC West 2020, to be held in July at the Sands Convention Center, Las Vegas, NV.
