

# Polyamide Barrier Packaging Market In-Depth Analysis By Size, Share, Trend and Top Players 2019-2027

*Overall Polyamide Barrier Packaging business scenario presented through self-explanatory charts, tables, and graphics images add greater value to the study.*

NEW YORK CITY, NEW YORK, UNITED STATES, March 12, 2020 /EINPresswire.com/ -- The polyamide barrier packaging market study offers a comprehensive analysis of the key strategies, business models, and respective market shares of selected, most prominent participants in this landscape. Along with an in-depth report on the key influencing factors, segment-wise data, region-wise data, market statistics in terms of revenues, and country-wise data are offered in the complete study. This study is the most comprehensive documentation that captures all the facets of the evolving Polyamide barrier packaging market.

## Polyamide barrier packaging Market: Introduction

Nylon, also known as polyamide, is a clear and printable thermoplastic that has properties like a high melting point, relatively good strength, and toughness with a good oxygen barrier. It is scratches, punctures, and flex-cracks resistant. It is dissolvent in grease, oil, acidic food, etc. and these properties make polyamide packaging an ideal material for packaging as well as microwave cooking. Polyamide packaging is widely used as a packaging material for cheese, sauce, smoked fish, microwavable products, and dairy products. These materials are widely preferred by industries due to their high flexibility and non-reactivity with food products. Nylon barriers can be easily processed at any temperature and are recyclable. These barriers do not produce fumes on burning, and about 20% of ovenable and microwavable bags available are made of nylon barriers, owing to their high oxygen barrier properties and permeability to carbon dioxide.

## Polyamide barrier packaging Market: Dynamics

Factors like the rising demand for material for packaging of microwavable food products is one

of the major drivers of the polyamide barrier packaging market. Further, the rising disposable income of people is driving the demand for packaged food products. This is, in turn, augmenting the growth of the polyamide market. On the other hand, fluctuations in the price of nylon barriers are proving to be a hindering factor.

In terms of material type, the nylon packaging has been segmented into nylon 6; nylon 6,12; bio-based polyamide, biaxial-oriented polyamide, and others. Among these, the bio-based polyamide segment is anticipated to witness significant growth during the forecast period. Based on the product type, the nylon barrier packaging has been divided into pouches (monolayer and multilayer), bags, and others. In terms of end-use industry, the polyamide market has been segmented into food & beverages, pharmaceuticals, personal care, industrial, household care, and others. On the basis of application, the polyamide barrier packaging has been categorized into bulk food, hot fill, aseptic, ESL (Extended Shelf Life), and others.

### Polyamide barrier packaging: Regional Outlook

From the geographical view, the Asia-Pacific region remains the key consumer and producer of the Polyamide barrier packaging industry. The Asia-Pacific region is estimated to dominate across the globe and register robust growth in the coming years. Initiatives towards the food packaging are the rising trend and owing to the need for the flexible packaging market. Furthermore, North-America, followed by Europe, is projected to witness steady growth in the global Polyamide barrier packaging market in the upcoming years due to the high demand in the food packaging industry. Latin America, followed by MEA, is expected to register healthy growth in the sales of nylon films in the coming years.

### Polyamide barrier packaging: Competitive Landscape

The polyamide barrier packaging market is evolving as the scope of applications is increasing over the years. The market is consolidated in nature, with the market shares distributed among the key players. The companies offer products for specific applications. With the rise in demand, the new product development, merger & acquisitions, and investment & expansion strategies are estimated to offer growth potentials in the global Polyamide barrier packaging market during the forecast period.

### Polyamide barrier packaging: Segmentation

By Product Type (Revenue, USD Million; Volume in Kilotons, 2017–2027)

- Bags and Pouches
- Tray-Lidding Film
- Forming Webs
- Others

By Application (Revenue, USD Million; Volume in Kilotons, 2017–2027)

- Bulk food
- Hot fill
- Aseptic
- ESL (Extended Shelf Life)
- Others

By End-Use Industry (Revenue, USD Million; Volume in Kilotons, 2017–2027)

- Food Industry
- Health care
- Consumer Goods
- Others

By Region (Revenue, USD Million; Volume in Kilotons, 2017–2027)

- North-America
- Asia-Pacific
- Europe
- Middle-East and Africa
- Latin America

Polyamide barrier packaging Market: Market Participants

- Schur Flexible Groups
- Amcor
- Charter Nex Films
- ALPLA-Werke
- Celplast Metallized Products
- Daibochi Plastics
- DuPont
- Mondi
- RPC Group
- INPAC Group

Key questions answered in Polyamide Barrier Packaging market report:

- How has the Polyamide barrier packaging market evolved over the past three years?
- What size is the Polyamide barrier packaging market expected to take in terms of volume (Kilotons) and value (USD Million) during the study period?
- What are some of the technological developments and new opportunities in the Polyamide barrier packaging market?
- What are the market dynamics in the Polyamide barrier packaging market?
- What are the underlying industry factors impacting the growth of the Polyamide barrier packaging market?
- What are the market positioning and strategies of key manufacturers concerning for Polyamide barrier packaging market taxonomy?
- What are the key challenges, improvement factors, and opportunities for Polyamide barrier packaging market players?
- How is the competition structured in the Polyamide barrier packaging market at present, and how will it take shape over the next few years?
