

# Stem Cell Therapy for the Coronavirus COVID-19 Pandemic

Golden, Colorado—March 18, 2020—Vitro Diagnostics, Inc. (OTCPK: VODG), dba Vitro Biopharma reports on its therapy for the Coronavirus (COVID-19) pandemic.

GOLDEN, CO, UNITED STATES, March 18, 2020 /EINPresswire.com/ -- Recent umbilical cord stem cell therapies in China to fight the Coronavirus are producing encouraging emergency results. [Vitro Biopharma](#) has the highest level of umbilical cord stem cell technology to reduce death rates due to the Coronavirus pandemic.

Dr. Jim Musick, Ph.D., CEO said, "As the world struggles to deal with the COVID-19 pandemic, it is important to consider stem cell therapy to reduce death rates."

Dr. Jim Musick, Ph.D., CEO said, "As the world struggles to deal with the COVID-19 pandemic, it is important to consider [stem cell therapy](#) to reduce death rates. This is supported by clinical studies and clinical trials are underway to substantiate safety and efficacy. Vitro Biopharma is ideally suited to provide high quality stem cells to US patients, produced under strict quality control in a cGMP, ISO9001 & ISO13485 Certified environment. Our umbilical cord AlloRx™ Stem Cells and stem cell growth media MSC-Gro™ have been used in the treatment of hundreds of patients without adverse events and show efficacy in treatment of COPD, osteoarthritis, multiple sclerosis and Alzheimer's disease.

Out of years of research, we developed our patent-pending and proprietary line of umbilical cord derived stem cells AlloRx™ Stem Cells now being used in offshore regenerative medicine clinical trials. Our stem cells are used in regenerative medicine clinical trials with our partner in the Cayman Islands [www.DVCStem.com](http://www.DVCStem.com).

Vitro Biopharma has a patent-pending, proprietary and scalable manufacturing platform to provide stem cell therapies to critically ill Coronavirus patients. Our stem cells have been shown to be safe in Phase I protocols as we also gain evidence of efficacy.

We are in contact with federal, state and local governments to inform them of our AlloRx™ Stem Cell therapy option for Coronavirus infections. The pandemic deserves consideration of all therapeutic options and there is evidence that stem cell therapy reduces the death rate from Coronavirus COVID-19 infections. We believe that critically ill patients should have the right to try stem cell therapy in the United States."

#### Forward-Looking Statements

Statements herein regarding financial performance have not yet been reported to the SEC nor reviewed by the Company's auditors. Certain statements contained herein and subsequent statements made by and on behalf of the Company, whether oral or written may contain "forward-looking statements". Such forward looking statements are identified by words such as "intends," "anticipates," "believes," "expects" and "hopes" and include, without limitation, statements regarding the Company's plan of business operations, product research and development activities, potential contractual arrangements, receipt of working capital, anticipated revenues and related expenditures. Factors that could cause actual results to differ materially include, among others, acceptability of the Company's products in the market place, general economic conditions, receipt of additional working capital, the overall state of the biotechnology industry and other factors set forth in the Company's filings with the Securities and Exchange Commission. Most of these factors are outside the control of the Company. Investors are cautioned not to put undue reliance on forward-looking statements. Except as otherwise required by applicable securities statutes or regulations, the Company disclaims any intent or obligation to update publicly these forward-looking statements, whether as a result of new information, future events or otherwise.
