SEATTLE, WASHINGTON, USA, March 23, 2020 /EINPresswire.com/ -- Sagacious IP Launches [Coronavirus Research Assistance Program](#) for the Global Science Community

As COVID-19 continues to disrupt the global economy and people's lives, the role of Science in finding a cure to the virus is critical. Sagacious IP has launched a Coronavirus Research Assistance Program to contribute to the ongoing global efforts to combat COVID-19. This program is essentially aimed at helping scientists accelerate discovery of prevention and/or cure for COVID-19.

About the Coronavirus Research Assistance Program and Why Sagacious IP

Sagacious IP has one of the widest access to global patent/non-patent literature in multiple languages and has diverse multi-lingual team to analyze and translate such literature. Further, Sagacious IP has in the past successfully supported accelerated development of cures for many rare diseases by working closely with scientists working on them.

In this time of current crisis, we are committed to help researchers get timely & exhaustive information about previous research on Corona or similar viruses so they can accelerate their efforts to find a cure/prevention.

Under this program, Sagacious IP is committing 1,000 hours of free professional information support to the members of the global science and research community working to tackle the COVID-19 outbreak. Notably, this program allows you to request researched information from Sagacious IP to give direction to your ongoing research, navigate any invention roadblocks and

get expert guidance to help you accelerate R&D efforts. This information can be requested based on study of past research related to coronaviruses and any similar viruses.

Researchers can also download an overview of existing scientific literature, both patent and non-patent on the coronavirus for free through [this link](#).

“Being a microbiologist who previously worked in labs to find cure for prevalent diseases, I do understand the pressure researchers are in when they are racing against time. I have personally seen how getting the information timely can reduce the time to output. When I was researching Tuberculosis, our team was struggling for almost 2.5 years before we got the right information from a professional research organization, taking us to the next stage within next 4 months,” said Tarun Kumar Bansal, President, Sagacious IP, on the launch of the program.

“At Sagacious IP, we have supported number of research programs (for example for a rare disease called DMD) in the past. The Coronavirus Research Assistance program is very close to my heart and we will try our best to support scientists get success quickly,” said Tarun Kumar Bansal, President, Sagacious IP, on the launch of the program,” he added.
