

# FIOR Bioscience Response to Earthquake in Salt Lake City

*FIOR Bioscience response to 5.7-magnitude earthquake and subsequent aftershocks*

SANDY, UTAH, UNITED STATES, March 24, 2020 /EINPresswire.com/ -- [FIOR Bioscience](#), a leading producer and provider of post-natal flowable biologic allografts, recently experienced a regional earthquake followed by

several aftershocks. Following careful examination, the company is pleased to announce that there is no damage to any of its facilities or equipment and that all inventory, privately stored samples, and operating capacity are unaffected.

“

Because FIOR Bioscience manages all aspects of our processes from beginning to end, we can continue to operate fully during times like these.”

*Elliott Spencer, President and Chief Scientific Officer*

According to FIOR’s President and Chief Scientific Officer Elliott Spencer, “Because of our years of preparation, the company is running as usual. Due to our stack of redundant servers, our unprecedented tracking portal that helps physicians record treatments with our products is secure. Furthermore, our research laboratories, our new ISO Class 7 clean room, our massive pre-COVID-19 inventory, our long-term cryogenic storage facilities, our shipping facility, and our manufacturing laboratories remain unaffected. Because FIOR Bioscience manages all aspects of our processes from beginning to end, we can continue to operate fully during times like these.”

## ABOUT FIOR BIOSCIENCE

FIOR Bioscience is privately-owned FDA-registered laboratory which has pioneered several important advancements in postnatal-tissue-derived regenerative medicine. After 15 years as an FDA-inspected facility, FIOR and its predecessor company, Utah Cord Bank, have maintained a perfect inspection record with no Form 483 Citations.
