Market dynamic / Drivers & Restraints to Market Growth

Climatic changes directly impacts the agricultural production. In past few years U.S. and Australia region experienced in the decline in agricultural productivity due to extreme heat in the region. IoT (internet of things) -based solutions will help in weather monitoring which will eventually increase crop yield. However, High cost of IoT based solutions for farming is a major concern for farmers majorly in developing countries such as China, India and Brazil. Huge initial investment in digital farming technology is a key factor which is hindering the growth of global smart agriculture market
