The electric motorcycles and scooters are powered by rechargeable batteries instead of fuel. Most of the electric motorcycles and scooters use lithium-ion batteries. The lithium-ion batteries used in electric vehicles have a higher energy density, longer life span and higher power density than most other batteries. In electric motorcycles, approximately 90% of the energy from the battery is converted to mechanical energy. These vehicles are charge from conventional power outlets or dedicated charging stations and it typically takes hours to charge. In the larger cities in the United Kingdom and Europe, owners of the vehicle can plug in their vehicles at work and leave them for a charge.

## Market Drivers

- Increasing Awareness about Environmental Concerns among People
- Government Incentives for Adoption of Electric Vehicles
- Increased Disposable Income of the People in Developing Countries

## Market Trend

- Rising Demand for Eco friendly Vehicles

## Restrains

- Low Performance Compared To Petrol or Gas Powered Vehicles
- Charging a Battery Takes Longer Time

Microeconomic and macroeconomic factors which affect the Electric Motorcycles & Scooters Market and its growth, both positive and negative, are also studied. The report features the impact of these factors on the ongoing market throughout the mentioned forecast period. The upcoming changing trends, factors driving as well as restricting the growth of the market are mentioned.

The Global Electric Motorcycles & Scooters Market is gaining pace and businesses have started understanding the benefits of analytics in the present day highly dynamic business environment. The market has witnessed several important developments over the past few years, with mounting volumes of business data and the shift from traditional data analysis platforms to self-service business analytics being some of the most prominent ones.

For the future period, sound forecasts on market value and volume are offered for each type and application. In the same period, the report also provides a detailed analysis of market value and consumption for each region. These insights are helpful in devising strategies for the future and take necessary steps. New project investment feasibility analysis and SWOT analysis are offered along with insights on industry barriers. Research findings and conclusions are mentioned at the end.
