Your reflex point system mirrors your human body's organs and the entire anatomy system; the human body is electrical. When the electrical current in the human body drops below 50% disease, disorders can occur. Imbalances will develop in the body where you most likely carry weaknesses genetically or from stress build-up, anxiety, environmental issues, and typical toxicity issues.

The goal is to bring your body back in balance by restoring the electrical current back into your human reflex system; once this occurs, your body can operate at its optimum performance. And your human body will naturally strengthen itself, and correct your health issues with ease.

At Techni-Calm Reflex, we can help by restoring the electrical current back into the reflex system for individuals struggling with Parkinson's.

We will offer tremendous results in restoring movement function as well as correcting Parkinson's symptoms.
