“

Education ERP Market Insights by Size, Status and Forecast 2025”

Nidhi Bhawsar

ERP (Enterprise Resource Planning) system is process management that has been helping major organizations to integrate business management with the support of various automated functions. ERP automation system reduces back-office processes and also cuts the total time

required for admissions to some extent. The key benefits involved with such system include improved efficiency, cost-effective advantages, and data security. . Further, increasing Demand for Video-Based Learning methods to modify primary and secondary Education and need of automated management to carry out business processes in academic institutions is expected to foster the education ERP market in the forecast period.
