Ticket Management Software

Definition:

The Increase in-demand for process automation and business intelligence is pushing the deployment of ticketing software, with small and large enterprises shifting towards Software-as-a-Service (SaaS) and other hosted services from on-premise enterprise software applications. Also, smart ticketing better options in tourism, as well as the transportation industry, are driving the ticketing software market. Technologically advanced feature such as smart locking in ticket software has helped in reducing incidences of revenue loss. Additionally, due to features including fingerprint recognition and ultra-touch fingerprint sensors, the adoption of ticketing software will continue to witness growth across various end-use industries. Increasing demand for optimizing public transportation and deliver improved services and ticket access to passengers would support the ticketing software market, globally. Transportation is anticipated to remain the largest consumer of ticketing software owing to the growing community of multiple and interdependent vendors.
