## [Hand Sanitizers Market 2020](#)

Description: -

Hand sanitizer is an antiseptic liquid, foam, or gel used to inhibit the spread of infectious microorganisms and other harmful bacteria on the hands. Alcohol-based hand sanitizers are generally more effective in eliminating microorganisms. The hand sanitizer is used to address microorganisms immune to soap and water. Alcohol-free hand sanitizers constitute another type of sanitizer. These do not strip away oils from the skin and retain moisture.

Scope of the Report:

This report focuses on the Hand Sanitizers in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

Factors that drive the growth of the global hand sanitizer market include change in lifestyle of people and increase in consumer inclination towards health. Moreover, rise in awareness about hand hygiene has significantly influenced the market. However, health hazardous associated with hand sanitizer are expected to hamper the market growth in the near future.
