

Global Shipboard Cables Market Covid-19 Impact And Recovery Overview

The Business Research Company adds Shipboard Cables Global Market Report 2020-30: Covid 19 Impact And Recovery to its research store

LONDON, GREATER LONDON, UK, April 6, 2020 /EINPresswire.com/ -- The global shipboard cables market is expected to grow at a rate of about 12.44% and reach \$5.77 billion by 2023. The increase and expansion of offshore oil & gas plants is driving the shipboard cables market. The expansion of offshore oil & gas plants includes electrification of their platforms, which involves the use of efficient shipboard cables to connect oil platforms to mainland power grids. However, the increasing cost of raw material hampers the shipboard cables market.

The shipboard cables market consists of sales of shipboard cables and related services. Shipboard cables are used for electrical installations in ships and offshore platforms for the transfer of electric power to electric panels for lighting, control circuits, the transmission of vital instrumentation signals. They are fire-resistant, flame retardant, low smoke & halogen-free cables.
