Injectable Drug Delivery 2020

For interested parties, an early bird saving of £600 for bookings made by 30th April 2020 is available online. Register at www.injectable-drug-delivery.com/einpr7

On the run up to the conference, Novartis has been confirmed to provide a keynote presentation on 'Innovations in Device Design to Aid Drug Delivery'.

Chris Muenzer, Senior Device Technology Manager, Novartis will present on 'Standardizing the Design Input Process Using System Engineering Tools' covering:

- Case study on the effort of Novartis to standardize our design input process
- The challenges of setting design inputs
- Why the boundary between design inputs and design outputs is so hard
- What is a 'good' requirement
- How system engineering tools can be applied to drug delivery devices

Alexander Zuern, Device Testing Manager, Novartis will present on 'Click sound characterization of autoinjectors' covering:

- Different devices were characterized on the frequencies and loudness of click sounds
- A correlation between the click sounds and other parameters such as activation force were made
- Homogeneity of click sounds were characterized

As part of Europe's leading Injectable conference series, delegates will have the chance to delve

into the latest work in complex formulation for subcutaneous delivery, potential for connected drug delivery and many more.
