The increasing number of security threats will help to boost global content security market in the forecasted period. The regular usage of e-mails and websites have made enterprises tremendously susceptible to cyber threats and attacks. Complex cyber-attacks have led to an increase in advanced persistent threats (APTs) that affect the whole IT infrastructure of enterprises. To defend themselves from various cyber-attacks, enterprises are adopting network and content security solutions to enrich their network security. Increasing use of BYOD among enterprises, growing complexity of threats and lack of internet security in mobile devices increases the vulnerability of these devices. These are the driving factors of the content security market.

Market Trend

- Increasing Demand for Cloud-Based Solutions
- Advantages of This Content Security Policy
