However, HIV / AIDS, influenza, malaria, and tuberculosis are other infectious diseases known to pose high pressure.

Also, Resistance levels to increase over the forecast period 2020-2026 according to researchers, but can fluctuate depending on the pressure, geographies, and ethnicity of the patient.

Regional characteristics of Antibiotics Market size

North America and Asia Pacific to maintain a large proportion of the antibiotics market over the

forecast period 2020-2026.

The healthcare system in the North American region encourages the use of branded goods, but with the loss to exclusivity of certain molecules, profits in this area have significantly eroded.

In American's region developed countries especially Brazil with its strong growth in the pharmaceuticals sector to show lucrative growth.

Factors driving the Asian Pacific region include the prevalence of numerous infectious diseases, favorable regulatory changes, population growth and unhygienic conditions resulting in bacteria resistant to antibiotics, and substantial demand for generic medicines.

Further, development of new antibiotics is important for the emergence of multi-resistance tuberculosis and methicillin-resistant *Staphylococcus aureus* (MRSA) infections.

In addition, increase in occurrence of pneumonia, blood stream infections, and Urinary Tract Infections (UTI) to promote the use of carbapenems class of antibiotics.
