Phosphatidylserine is an amino acid derivative compound similar to a dietary fat which is highly prevalent in human neural tissue. Typically it is white or light yellow loose powder but also a small amount of phosphatidylserine is liquid. It is vital for cognitive function. Phosphatidylserine is high in neutral oil and fatty acids and produced in low purity that has an off-flavor to it.

Phosphatidylserine supplementation in older individuals seems to improve memory and cognitive capacity.
