However, major factor to challenge the market growth include lack of awareness and access to rehabilitation services in emerging regions.

Regional aspects of rehabilitation devices market

Europe and North America to hold the major market share for rehabilitation devices followed by Asia Pacific over the forecast period.

Supporting government programs for safe handling of patients, increase in geriatric population and high chronic burden are the factors driven the market growth in Europe.

Further, Reimbursement programs, improving access to recovery goods in North America's developing countries to improve consumer demand.

In addition, favorable reimbursement schemes in developed countries, such as the United States, will give key producers major selling opportunities. Also, Medicare reimbursements too encourage people to rely on rehabilitation aids.

Whereas, in Asia Pacific region increase in number of physicians, supportive government programs & policies in developing countries like China, India, and Japan to boost the market demand in this region.
