

Global Cellular Telephones Market Overview

LONDON, GREATER LONDON, UK, April 13, 2020 /EINPresswire.com/ -- The global cellular telephone market is expected to grow at a rate of about 1.88% and reach \$4.39 billion by 2023. Rise in disposable income coupled with affordability increases the purchasing power of individuals and in turn propels the market for cellular telephones. However, uncertainty about government stabilities and policies affect imports of the raw materials required for manufacturing cellular telephones, creating a negative impact on the market.

The cellular telephones market consists of sales of cellular telephone and related services for text messaging, voice calling and video calling. Cellular telephones also have advanced computing abilities such as wireless internet, third-party applications and mobile payment, solutions for information management such as documents, emails, and contacts, and inbuilt GPS applications.
