Information Technology Service Management (ITSM) is a set of well-defined services that focus on the management of IT infrastructure, components, business applications, and associated processes. The Cloud ITSM provides a cost-effective, reliable, scalable, and secure solution that can be used by state agencies to manage incidents, service requests, problems, and changes in support of customers and lines of business. The growing adoption of cloud technology worldwide has driven the market demand for cloud IT Service Management (ITSM).

Market Trends

- Trend for Build Your Own Device (BYOD)

Market Drivers

- Automate Time-Consuming IT Processes to Speed up Service Delivery
- Integration of AI-Enabled Tools with ITSM Solutions

Restraints

- Security and Privacy Concerns
- Integration Concerns With Traditional Architectures

Challenges

- Lack of IT Service Efficiency
- Lack of Standard Procedures
