A science magazine is a periodic publication with various news, views, and reports about science, mostly written for a non-expert audience. In contrast, to a periodical publication, which usually includes primary research and reviews which is written by the scientific experts is known as a "scientific journal". The science magazine is also widely referred to as science journal, which is one of the peer-reviewed educational journals of the American Association for the Advancement of Science (AAAS) that is named to be one of the world's top academic journals. This was first published in the year 1880, and is currently circulated weekly and also has a subscriber base of almost 130,000. Because the institutional subscriptions and the online access are now serving a larger audience, hence it is estimated to have a readership of approximately 570,400 people. The major focus of this magazine is publishing all the important and original scientific researches and their respective research reviews, but the Science magazine also publishes the news related to science, opinions on the science policies and some other matters of interest to the scientists and others who all are concerned with the wide consequences of science and technology. Unlike most of the scientific magazines, which focus on just a particular field, Science and its challenging Nature covers the full range of all the scientific disciplines.

The Global Science Magazine is segmented by following Product Types:

Type (National Geographic, Psychology, Popular Mechanics, Others), Application (Individual, Commercial), Peer Review Type (Single-blind, Double-blind, Open review, Transferable, Collaborative, Post-publication), Distribution Channel (Online, Offline), End-Users (Students, Professionals, Colleges, Institutes, Research Organization, Others), Major Type (Independent-Type, Administrator-Type)

Region Included are: North America, Europe, Asia Pacific, Oceania, South America, Middle East & Africa
