A Nicotine Patch is a device or a transdermal patch that delivers or releases nicotine into the body through the skin. This patch is majorly used to prevent nicotine craving among the consumptions and is used as nicotine replacement therapy (NRT), which indeed help the smokers to slowly reduce their addiction towards nicotine. Nicotine Patch is worn on skin which releases a stream of drug reservoir into the blood. This patch contains a drug reservoir which slowly percolates out and penetrates through the skin into the blood stream of the consumer. This indeed helps in reducing the physical withdrawal symptoms which occurs during the early period of quitting smoking. Rising consumption of nicotine among the population is driving the market for the nicotine patch.
