Car Motor oil is a complex compound, which can be characterized by two main components that are additives and base oil. The base oil signifies synthetic base or petroleum or their combination and the additives offer prevention of base oil against corrosion and deterioration, neutralize acidic components, have dispersion and detergent effect, and keep viscosity stability. These additives help to satisfy the high requirements of engine operation in extreme situations. Moreover, the Main processes of car motor oil degradation are oxidation, chemical changes caused by thermal processes, mechanical decomposition and contamination, and corrosion. This is projected the growth of the car motor oil market in the forecast period.
