Definition:

Express delivery services are meant to deliver shipments in minimum possible time duration. The core objective of these services is to provide value added, door to door

transport and shipments on stipulated time including parcels, documents and merchandise goods. Rising e-commerce market and urbanization offer great potential for retailers and logistics. The express logistic is going through massive change owing to need for time bound delivery services to supplement trade growth. Express delivery accounted for the “Business Class” of cargo services. In terms of region Asia Pacific accounted for the largest market share in this industry due to the increasing population in this region. In term of economic condition express delivery also directly supports 1.25 million jobs, more than the petroleum refinery industry.

The regular update in report considering latest influencing factors allows industry participant to receive latest edition with additional chapter / commentary dictating latest scenario, economic

slowdown and COVID-19 impact on overall industry. Further it will also provide qualitative information about when industry could come back on track and what possible measures industry players are taking to deal with current situation.
