

Global HIV Drugs Market Overview

The Business Research Company's new report on HIV Drugs Global Market Report 2020-30: Covid 19 Implications And Growth

LONDON, GREATER LONDON, UK, April 17, 2020 /EINPresswire.com/ -- The global HIV drugs market is expected to grow from \$27 billion in 2019 to about \$30.5 billion in 2020 due to an increase in demand for such drugs for the treatment of Covid-19 patients. The market is expected to stabilize and reach \$34.2 billion at a CAGR of 5.9% through 2023. Increasing awareness among people regarding the diagnosis and treatment of HIV disease acts as an important driver for the growth of the HIV drug market. However, side effects of HIV Drugs have always been a major challenge in antiretroviral therapy.

The HIV drugs market consists of sales of Human Immunodeficiency Virus (HIV) drugs used for the treatment of HIV infection/AIDS. The market consists of revenue generated by the antiretroviral drug companies manufacturing the anti-retroviral drugs such as nucleoside reverse transcriptase inhibitors (NRTIs), non-nucleoside reverse transcriptase inhibitors (NNRTIs), entry and fusion inhibitors, integrase inhibitors, and protease inhibitors (PIs) for the treatment of HIV infection.
