The unavailability of kidney donors for transplantation increases worldwide demand for hemodialysis among CKD patients, which in turn propels the scale of the catheter hemodialysis market value.

Regional aspects of hemodialysis catheters market share

Asia-Pacific is set to hold the major market share in the hemodialysis market and is estimated to maintain its lead throughout the forecast period 2020-2026.

The growth is due to the availability of efficient hemodialysis centre and favorable reimbursement policies in the developed countries such as China and India.

In addition, growth in geriatric population, increase in incidence of ESRD, and rise in acceptance of household hemodialysis and peritoneal dialysis to propel the regional market to expand.

The availability of healthcare professionals in hospitals and in dialysis centers of the developing countries to positively impact the market growth.
