

Global Corticosteroids Therapy Market Growth Rate

The Business Research Company's latest study on Corticosteroids Therapy Global Market Report 2020-30: Covid 19 Implications And Growth

LONDON, GREATER LONDON, UK, April 21, 2020 /EINPresswire.com/ -- The global corticosteroids therapy market is expected to grow from \$4.2 billion in 2019 to about \$4.5 billion in 2020 as there is a marginal increase in demand due to the use of corticosteroids along with other drugs for the treatment of COVID-19 patients. Increasing prevalence of skin-related disease and the rising incidences of rashes, dermatitis, itching, eczema, and psoriasis contributes to the growth of the corticosteroids market. However, side effects associated with the long-term use of corticosteroids is negatively affecting the market.

The corticosteroids therapy market consists of sales of synthetic corticosteroid drugs used to treat a wide variety of disorders, including asthma, arthritis, skin conditions, autoimmune diseases and lowers inflammation in the body. Corticosteroids and their biologically active synthetic derivatives differ in their metabolic (glucocorticoid) and electrolyte-regulating (mineralocorticoid) activities. These agents are employed in physiological doses for replacement therapy when endogenous production is impaired.
