# ADA Unveiled the list of Top Java Development Companies

*ADA selects the best Java Developers that met the diverse business needs of the enterprises. Take a look!*

BELMONT, UNITED STATES, April 27, 2020 /EINPresswire.com/ -- Java language is for creating programs that can run on any type of hardware that is supported or any operating system. It features Int, optimizes, StringBuilder, String.Utils.replace, bottleneck, String, valueOf, profiler, BigInteger, log.debug, test suite besides several other features and functions.
Platform independent, secure, robust, portable, different from C and C++, dynamic, object-oriented, robust language, multi-threaded, different from JavaScript – That is all the Java as one of the oldest and stable object-oriented languages has been for and increases its popularity further. The Java Web Development technologies that are widely prevalent these days include Groovy plugin, Grails framework, Jersey, Restlet, Spring,

SpringREST, Struts, Bigdata, Hadoop, Hibernate, Liferay, and EJB along in our agile development methodology. These are accompanied by Java Application Design, Java Smart Client, Java Standalone Application Development, JFC/Swing Development are the technical skills of our experienced Java developers who follow a transparent & collaborative approach in building Java-based applications for web and mobile.

ADA chose J2EE/Java Developers who use J2EE technology to build high-end Java applications for diverse enterprises. Their Java Application Development Service is enterprise-oriented to ensure business growth leveraging enterprise applications development on Java Platform. The key to the quick and efficient development of the Java web Applications followed by Top Java Development Companies:

• Never optimize if it's not necessary
• Making use of a profiler to find the real bottleneck
• Create a performance test suite for the whole application
• Working on the biggest bottleneck first
• Making use of StringBuilder to concatenate Strings programmatically
• Making use of + to concatenate Strings in one statement
• Making use of primitives where possible
• Trying to avoid BigInteger and BigDecimal

• Checking the current log level first
• Making use of Apache Commons StringUtils.replace instead of String.replace
• Cache expensive resources, like database connections

In the best interest of the clients' to which these top companies cater, they have been into App performance management, Centralized Logging, Code Profiling, Error Tracking, App Server and Metrics and Real User Monitoring. Java Migration, Integration of Payment Gateways, Enterprise Java Development, Java Web Development, J2EE Development, Java CMS Service etc., were among few services that these firms have been catering:

1. Konstant Infosolutions
2. Intellectsoft
3. Oxagile
4. QBurst
5. Techugo
6. Cleveroad
7. Elinext
8. Ready4S
9. MLSDev
10. Octal Info Solution
