

# Anderson Zaks & Eurostop launch new One Device Mobile Payment Solution for the Fashion, Footwear & Lifestyle sectors

*Now available in the UK, the Sunmi secure electronic payment terminal could help fashion retailers comply with social distancing rules*

BRACKNELL, BERKSHIRE, UNITED KINGDOM, April 27, 2020 /EINPresswire.com/ -- Anderson Zaks, an independent, UK-based multichannel [Payment Gateway](#) and Eurostop, a leading supplier of retail management and EPOS solutions to fashion, footwear and lifestyle retailers worldwide, has together developed a new 'one-device' solution for [mobile POS](#). Based on the Sunmi P2 Lite the solution provides in built scanning, EPOS and integrated card payments on one device. This provides the flexibility for retailers to take payments from any location within the store, helping to comply with social distancing rules, and also at off-site events such as festivals and pop-ups.

The Sunmi P2 Lite was selected by Eurostop, and supported by Anderson Zaks, after extensive research for its stylish and light weight design and for the quality of its scanner which is important for certain sectors such as jewellery. The Sunmi P2 Lite provides omni-channel payment capabilities including contactless, Chip & PIN, magnetic stripe and keyed entry solutions as well as support for 1D and 2D code scanning. It operates seamlessly with 4G, 3G, Bluetooth, WiFi and 2.4G/5Ghz connectivity.

The new solution combines a modified version of Eurostop's market leading EPOS solution e-pos touch, with Anderson Zaks' RedCard payment gateway, and merchant acquiring services via Elavon. The solution is simple to use and provides next day settlement at competitive rates. It is certified for use by Elavon for all European markets where it operates.

Jeremy Rodrigues, EPOS Support Manager at Eurostop commented: "We have worked with Anderson Zaks for many years, and so were delighted when they agreed to develop this solution for the Sunmi P2 Lite. The solution is designed specifically for the fashion, footwear and lifestyle markets, and when used with services like ApplePay/GooglePay can process contactless payments over the current £45 limit, which supports social distancing. We already have several customers keen to take the new solution."

Iain High, CEO at Anderson Zaks commented; "As the remaining independent payment gateway in the UK, we endeavour to go that extra mile to support our customer and partners every changing needs. The Sunmi story bares testament to this."
