

Covid 19 Testing to help your business and employees safely get back to work

Environmental Mold LLC & Armour Applied Sciences Partner to Offer FDA-Approved Analysis Testing for COVID-19 in Building Surfaces

HUNTINGTON BEACH, CALIFORNIA, UNITED STATES, April 28, 2020 /EINPresswire.com/ -- Institutions and companies testing for coronavirus is a smart priority in an effort to maintain the health of both employees and customers. [Environmental Mold LLC & Armour Applied Sciences](#) are risk assessment experts who are now using an FDA-approved testing of buildings.

Smart and ethical companies are taking every effort possible to keep both employees and customers healthy through a wide range of suggested measures. A new space is expanding, with Environmental Mold LLC and Armour Applied Sciences partnering to lead the way in the extended Orange County, California area, and in Ohio, in building COVID-19 testing. The companies are top indoor air quality consultants who specialize in infection control. They recently announced they are the first to offer local FDA-approved analysis under the Emergency Use Authorization for testing COVID-19 virus in surfaces in buildings. The goal is to help organizations better manage and make a best effort to eliminate the risk of transmission to employees and customers. The new service has been met with enthusiastic feedback.

“All our decisions must be based on risk assessment of real-world situations and application of the known science,” commented Scott Armour, creator of [COVID-LOGIC](#). “Coronavirus testing of surfaces is a serious matter and getting the FDA-approval was key.

Keith Harris of Environmental Mold LLC continued, “We are here to provide as much value as we can to your company in this difficult time, so we developed a solution driven protocol to help assure the safe and efficient return to work for employees and customers.”

Armour has published four industry articles on COVID-19 in the last three weeks and developed the COVID-LOGIC risk assessment protocol.

A safety and health manager at a midwest manufacturing facility with 800 employees recently remarked, “We are so happy Scott was here to help us. The COVID-Logic LOGIC system of risk assessment and recommendations got us a 5-star review from the Public Health District

inspection for compliance with the state COVID-19 protocols.”

Armour and Harris sincerely hope they can be of value to the communities they serve in this trying time by offering another angle at coronavirus risk assessment and potential reduction of transmission. They recommend contacting them to discuss and individual needs in this area and how they can best meet them.

So far the feedback has been very promising.
