Cobalt powder is a fine grain powder which appears similar to iron or nickel and extracted from earth crust where it is found in association with nickel. It has various industrial uses due to its unique properties such as high melting point, retaining its strength at a high temperature, being ferromagnetic, thermostability and being multivalent. Cobalt also possesses excellent chemical, physical and mechanical properties, which is used for fabricating various alloys, used as wear resistant and high-temperature components, cutting tools, dies and saw among others. It is also used in rechargeable batteries in mobile phones, laptops, tablets and other electronic devices.

These factors are expected to drive the cobalt market in the forecasted period.
