COVID-19 Impact Review: What to Expect from Respiratory Tract Infection Industry in 2025? - Abbott, AstraZeneca, Teva Pharmaceutical, AbbVie, GlaxoSmithKline, & Pfizer

We are Now Including the Impact Analysis of the COVID-19 on this Premium Report and the Forecast Period of this Report shall be Revised to 2020-2026.

The Section on the Impact of COVID-19 on this Market is Included in the Report for Free. To Know More Request Sample of this Report: <https://www.infiniumglobalresearch.com/reports/sample-request/14888>

Respiratory tract infection is defined as any infectious disease of the upper or lower respiratory tract. Upper respiratory tract infections (URTIs) include laryngitis, common cold, pharyngitis/tonsillitis, acute rhinosinusitis acute rhinitis, and acute otitis media. Lower respiratory tract infections (LRTIs) include acute bronchitis, bronchiolitis, pneumonia, and tracheitis. The respiratory tract infection market is expected to grow during the forecast period.

Increasing Occurrences of Respiratory Illness is the Major Factor Driving the Growth

Increasing occurrences of respiratory illness are the major factor driving the growth of the respiratory tract infection market across the globe. According to the World Health Organization, nearly 334 million people suffer from asthma, the most common chronic disease of childhood affecting 14% of all children globally. Furthermore, lung cancer kills 1.6 million people each year and is the most deadly cancer.

Increased Air and Water Pollution Creates an Opportunity for the Growth of the Market

Moreover, the increase in the elderly population also boosts the growth of the market over the

forecast period. However, the growing frequency of antibiotic resistance and adverse events relating to the consumption of NSAIDs will hamper the growth of the respiratory infection market. On the other hand, rapid industrialization in the developing countries leading to increased air and water pollution creates an opportunity for the growth of the market in the upcoming years.

Rise in the Elderly Population Boosts the Growth of the Industry

North America is leading the respiratory tract infection market due to an increase in the prevalence of upper respiratory tract infections. Furthermore, the rise in the elderly population also boosts the growth of the market in the region. Moreover, the rise in multi-drug resistance bacterial infection among children and immune-compromised adults also helps in the growth of the market in the North American region.

Asia Pacific is Expected to Grow During the Forecast Period

The Asia Pacific is expected to grow at a faster rate during the forecast period owing to the rise in patient awareness, better health care infrastructure, and facilities, high disposable income, occurrence of an unhealthy lifestyle, etc.
