

# Methanol Institute Organizes Bio-Methanol Webinar

*Complementary May 28 webinar will explore bio-methanol*

WASHINGTON, DC, UNITED STATES, May 18, 2020 /EINPresswire.com/ -- The Methanol Institute (MI), the trade association for the global methanol industry, is organizing a complementary "Why Bio-methanol" webinar in partnership with Södra and NextChem which will take place on May 28, 2020 at 0900 EST/1500 CET.

Circular processes have been identified as instrumental in extending value chains by increasing the utility of what would normally be considered waste or byproducts. Bio-methanol is a clean and sustainable fuel that can be produced from a variety of feedstocks such as municipal solid waste (MSW), agricultural waste, and forestry residues. The production of bio-methanol offers a solution for the diversification of waste management by diverting waste from landfills and incinerators into the production of a higher-valued clean petrochemical that can also be used as a fuel.

The webinar aims to share the experience of 2 companies that work with bio-methanol production in their own regulatory and commercial landscapes in Sweden and Italy. The companies will also shed some light on what they think is the future for bio-methanol as a solution to some of today's pressing environmental challenges.

MI CEO Gregory Dolan notes that "MI is pleased to offer this webinar, the first in a series which will explore the range of methanol production pathways and market applications for today's economy, and that of the future."

To register for the webinar, free of charge, click [HERE](#). For more information on bio and renewable methanol, read or download MI's [Renewable Methanol Report](#)

**WEBINAR:**  
**WHY BIO-METHANOL**

DATE: 28 MAY 2020  
TIME: 0900 UTC-04 | 1500 UTC+2 | 2100 UTC+8

**REGISTER NOW**

**Speakers**

- Viktor Odenbrink  
Sales Manager  
SÖDRA
- Giacomo Rispoli  
Senior Executive  
Waste to Chemical  
NextChem  
New Treatment for Energy Production

**Moderator**

- Tim Chan  
Manager, Government Relations  
& Business Development  
METHANOL INSTITUTE

“

MI is pleased to offer this webinar, the first in a series which will explore the range of methanol production pathways and market applications for today's economy, and that of the future”
